Council for Geoscience

# **FOREWORD**

The Promotion of Access to Information Act (PAIA) (Act No. 2 of 2000) was enacted to give effect to the right of access to information contained in Section 32 (2) of the Bill of Rights of the Constitution of the Republic of South Africa, 1996.

The Council for Geoscience (CGS) is the national custodian of all geoscientific information and its dissemination to stakeholders and clients. The Geoscience Act (Act No. 100 of 1993) and its Amendment (Act No. 16 of 2010) states that geoscience data and information records published by the CGS in the form of maps, documents and databases are to be made available to stakeholders and clients.

This provision gave rise to the development of the Pricing guidelines. Through the guidelines, the cost of data and information has been updated to ensure that the prices are current but yet affordable to the various categories of stakeholders and the public. The Pricing guidelines necessitated the development of a Data and Information Catalogue. This catalogue outlines the different categories of maps and databases available at either a cost or no cost.

Moreover, in an effort to streamline data and information management, the organisation further adopted a Data and Information policy and subsequently appointed a Public Information Officer to streamline the function of the dissemination of data and information on behalf of the organisation and its key stakeholders.

For all information and data requests, the Public Information Officer can be contacted on [data@geoscience.org.za](mailto:data@geoscience.org.za) for data related queries or [library@geoscience.org.za](mailto:library@geoscience.org.za) for information from the National Geoscience Library.

General enquiries [info@geoscience.org.za](mailto:info@geoscience.org.za) or +27 12 841 1025.
